CONTINUOUS INTERNAL EVALUATION- 3

	The joint probability distribution of two random variables X and Y is as follows. Compute (a) Marginal distributions of X and Y (b) E(X), E(Y) (c) Standard deviation of X and Y (d) Coefficient correlation between X and Y.																						
b	Sample analysis of examination results of 500 students was made. It was found that 220 students failed, 170 secured 3 rd class, 90 has secured 2 nd class and 20 had secured 1 st class. Do these figures support the general examination result which is in the ratio 4:3:2:1 for the respective categories. ($\chi_{0.05}^2=7.815$ for 3d.f)					8	L3	CO4															
c	Explain the terms (i) Null hypothesis (ii) Alternate hypothesis (iii) Type I and Type II errors (iv) Confidence intervals.					8	L3	CO4
